KHUSHLEEN KAUR SEKHON

+91 7087473219 | sekhonkhushleen@gmail.com | Bengaluru, Karnataka, India | LinkedIn | GitHub

PROFILE

I've worked hands-on with SQL through projects involving MySQL/PostgreSQL schemas and queries for tracking, filtering, and reporting. As Chairperson of IEEE-CIET, I also analyzed registration, attendance, and feedback data for 1,000+ participants to identify trends and support planning decisions. I've strengthened this foundation through IBM's AI Enterprise Workflow Specialization and Anthropic's AI Fluency Framework & Foundations. I'm excited to apply these skills to real business problems, learn quickly, and contribute from day one as an immediate joiner, with the goal of growing into a long-term role.

TECHNICAL SKILLS

Databases & Query Languages: SQL (MySQL, PostgreSQL) - schema design, joins, aggregations, hands-on querying
Data & Business Analysis: Excel & Google Sheets (formulas, pivot tables), requirement-gathering, market/data research, hypothesis testing
Programming Languages: Python, Java, C++, JavaScript
Web Technologies: React, Node.js, Express.js, HTML/CSS
Core CS Subjects: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
Developer / Cloud / AI Tools: Git, GitHub, VS Code, AWS, Postman, Claude/AI workflow tools

EXPERIENCE

GTM Intern | *Recrivio* July 2026 – Present

- Researched and analyzed 120+ companies to identify target segments and evaluate hiring/background-verification requirements, supporting B2B SaaS market positioning.
- Conducted market segmentation and buyer persona analysis using structured data to evaluate opportunities and prioritize prospects.
- Synthesized market research and prospect feedback into actionable insights and recommendations for GTM strategy.

Project Manager Intern | *Medoc Life* Dec 2024 – Mar 2025

- Analyzed client requirements and operational workflows to identify process gaps and translate findings into structured deliverables.
- Investigated backend workflows using Postman and internal frameworks to identify issues and support efficient project execution.

PROJECTS

Smart Email Assistant – AI-Powered System | *github.com/khushleensekhon* 2026

- Designed a relational MySQL schema (via Hibernate) to persist email interactions and reply templates, enabling analysis of reply-quality trends to improve prompt outputs.
- Trained a custom AI model on domain-specific email datasets for tone classification and context-aware reply generation; built a prompt-engineering and evaluation pipeline to iteratively improve output quality.
- Built the full product end-to-end: React.js frontend, Spring Boot + Hibernate backend, and Gemini API integration with structured fallback handling for reliability under API failures.

BorrowBox – Peer-to-Peer Lending Platform | *borrowbox-plum.vercel.app* 2025

- Designed a relational SQL schema for listings, borrow requests, and transaction status; wrote queries for status tracking, filtering, and reporting across user activity.
- Built a full-stack React.js + Node.js application with JWT-based authentication and WebSockets for live status updates; owned the product lifecycle from requirements to deployment on Vercel.

Haazri – Attendance Management System | *github.com/coderharpuneet/Haazri* 2024 – 2025

- Designed a full-stack system with role-based access control and real-time attendance tracking, translating user workflow research into concrete product features.

LEADERSHIP EXPERIENCE

Chairperson – IEEE-CIET Student Branch | *Chitkara University* 2025 – 2026

- Spearheaded 3+ hackathons and 10+ technical/non-technical events reaching 1,000+ students; led a 20+ member core team from budgeting through execution.
- Analyzed registration, attendance, and feedback data in Google Sheets across events of 1,000+ participants to track turnout trends and inform planning decisions.

EDUCATION

Chitkara University, Rajpura, Punjab Aug 2023 – Present
Bachelor of Engineering, Computer Science Engineering — CGPA 8.25

CERTIFICATIONS

- IBM AI Enterprise Workflow Specialization (incl. Data Analysis & Hypothesis Testing, Business Priorities & Data Ingestion) — IBM, Jul 2026
- AI Fluency Framework & Foundations; Claude 101 — Anthropic, Aug 2026
- DevOps, Cloud, and Agile Foundations Specialization — IBM/Coursera, Jun 2025
