KHUSHLEEN KAUR SEKHON

+91 7087473219 | sekhonkhushleen@gmail.com | Bengaluru, India | linkedin.com/in/khushleensekhon | github.com/khushleensekhon

SUMMARY

CSE '27 student who connects technical and business thinking to take products from user research to launch and iteration. Go-to-market experience in B2B SaaS, AI products shipped with the Gemini API, and leader of a 1,000+ member student tech community. Available full-time from May 2027.

EDUCATION

Chitkara University, Rajpura, Punjab Expected May 2027

Bachelor of Engineering, Computer Science Engineering | CGPA: 8.25 / 10

EXPERIENCE

GTM Intern | Recrivio (B2B SaaS) Jul 2026 – Present

- Researched 120+ companies and segmented them by hiring and background-verification needs to define target segments.
- Built buyer personas and a structured prioritization of prospects, focusing outreach on the highest-fit opportunities.
- Delivered product demos to prospective clients and converted them into paying customers, contributing directly to company revenue.
- Synthesized market research and prospect feedback into go-to-market recommendations, and presented the findings to the team.

Project Manager Intern | Medoc Life Dec 2024 – Mar 2025

- Gathered client requirements and mapped operational workflows to identify process gaps, translating findings into structured project deliverables.
- Coordinated between clients and the development team to prioritize requirements and track deliverables against timelines.
- Tested backend workflows using Postman and internal frameworks to diagnose issues blocking delivery and keep execution on track.

PROJECTS

Samjho – AI Explainer for Official Documents | khushleensekhon.github.io/Samjho Nov 2026

- Found that families with first-time digital users rely on one member to read bills, bank letters and government notices; interviewed families to define four core jobs: what is it, what to do, by when, and is it a scam.
- Built and launched a multimodal web app where users photograph any official paper and Gemini explains it in Punjabi, Hindi or English, with voice read-back, deadline reminders and one-tap sharing with family on WhatsApp (React, Node.js, Gemini API).
- Measured quality on real household documents (type, amount, deadline, scam detection) and in-app feedback, iterated on prompts, and built in privacy safeguards (no photo storage, masked account numbers).

Smart Email Assistant – AI-Powered Product | 2026
github.com/khushleensekhon/Final_SmartEmailAssistant

- Identified that professionals lose time writing routine replies in the right tone; defined and built an AI assistant that classifies tone and generates context-aware replies.
- Built tone classification on domain-specific email data and an evaluation pipeline to improve reply quality; shipped end to end with fallback handling for API failures (React, Spring Boot, MySQL, Gemini API).

BorrowBox – Peer-to-Peer Lending Platform | borrowbox-plum.vercel.app 2025

- Saw that students had no trusted way to lend and borrow items on campus; defined the MVP and owned it from requirements to launch, with real-time request tracking and secure accounts (React, Node.js, SQL, WebSockets, JWT).

LEADERSHIP & OUTREACH

Chairperson | IEEE-CIET Student Branch, Chitkara University 2025 – 2026

- Led a 20+ member cross-functional team (tech, design, marketing, sponsorships) to run 3+ hackathons and 10+ technical and non-technical events reaching 1,000+ students, owning everything from budgeting to execution.
- Analyzed registration, attendance and feedback data across events to track turnout trends and use them to shape planning decisions.
- Delivered technical talks and workshops, and pitched and presented projects at hackathons and faculty reviews.

SKILLS

Product: User research, requirement gathering, prioritization, Agile/Scrum, market segmentation, buyer personas, metrics and KPIs, AI evaluation, hypothesis testing
AI / ML: Gemini API integration, prompt engineering, LLM output evaluation, tone classification, Claude / AI workflow tools
Data: Data analysis, SQL (MySQL, PostgreSQL), Excel and Google Sheets (pivot tables, formulas)
Engineering: Python, Java, C++, JavaScript, React, Node.js, Express, Spring Boot, AWS, Git, Postman

CERTIFICATIONS

- IBM AI Enterprise Workflow Specialization (incl. Data Analysis & Hypothesis Testing) — IBM, Jul 2026
- AI Fluency Framework & Foundations; Claude 101 — Anthropic, Aug 2026
- DevOps, Cloud, and Agile Foundations Specialization — IBM / Coursera, Jun 2025
